QR Quartely Review

MSCI Strategy Indexes MSCI REIT Preferred Series The Rebalancing Date is the close of the second business day of the rebalancing month. The changes are announced as of the close of the second business day, implemented as of the close of the fourth business day, and effective from the fifth business day of the rebalancing month. MSCI Hedged Indexes Series have an additional currency component rebalancing specified by their individual schedules.

Reviewed on a quarterly basis, at the end of March, June, September and December. Additionally, the monthly share review process is designed to ensure that constituents of the index continue to reflect available market capitalization.

The rebalancing will be effective on 1st Monday business day of the month.

Reconstruction of the control of the Transitional Reconstitution represents a departure from the standard practice of making all of the rebalance changes on a single day. The conversion from current index membership and holdings to their updated pro forma targets is completed over a five-day (Wednesday to Tuesday) transition period.
